Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Preliminary amendment received February 28, 2002 has been entered and rejections based on the amendment are located below.

Allowable Subject Matter

1. The indicated allowability of claims 7-14, 16-19, 21, 22, 25 and 32-37 is withdrawn in view of the newly discovered reference(s) to Kaule (6,688,221).

Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaule (6,688,221).

Kaule discloses a valuable document with a security element comprising a thermochromic layer combined with an optically effective effect layer having visually testable properties (see column 1, lines 8-14 and column 3, lines 66-67 through column 4, lines 1-8 –“substances can be magnetic, luminescent, thermochromic, iridescent

Art Unit: 3722

and/or other substances having a special physical and/or chemical effect.”). The layer structure of the carrier layer is provided with a metallic cover layer (14) having gaps (15) in the form of the desired negative image (column 6, lines 32-41). The lacquer layer (11) is provided with a relief structure (12) in the form of a diffraction structure.

Regarding claim 22, the process of printing or producing the information (“by means of a laser”) does not structurally limit the claim. The patentability of a product does not depend on its method of production. Product-by-Process claims are not limited to the manipulations of recited steps, only the structure implied by the steps. (See MPEP 2113)

Regarding claims 28 and 29, the security element is a document of value, ID card, register mark, etc. (this would, inherently include a label).

Regarding claims 30-38, see the above rejections to claims 1-29.

Regarding claim 39, the process of forming the transfer material (“hot stamped foil”) does not structurally limit the claim. The patentability of a product does not depend on its method of production. Product-by-Process claims are not limited to the manipulations of recited steps, only the structure implied by the steps. (See MPEP 2113)

Response to Arguments

4. Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.
